Category:Q: ASP.NET + WebSql: The Entity or Complex Type cannot be constructed in a LINQ to Entities query I have two partial classes with a One-to-Many relationship (each class has a single key primary key). I want to search in each table with the minimum amount of code in each part (as I'm not using EF nor ADO.NET). Here is the code: public class UserTable { public UserID UserID { get; set; } public string Name { get; set; } public string DateBirth { get; set; } } public partial class User { public UserID UserID { get; set; } }
